THE GREAT WALL OF CHINA.

[From the London News.] The great wall of Caina was measured in many places by Mr. Unthank, an American engineer, lately. His measurements give the height at 18 feet and a width on the top of 15 feet. Every few hundred yard there is a tower 24 feet square and from 20 to 25 feet high. The foundation of the wall is of solid granite. Mr. Uathank brought with him a brick from the wall, which is supposed to have been made 200 years before the time of Christ. In building this immense stone fence to keep out the Tarters, the builders never attempted ! to avoid mountains or chasms to save Kanal, Carries, Polatio and Caars, Reno expense. It is supposed that he had found means to bribe the hangman, to whom he made a request to draw him up close to the pully and lower him gently when dead. But the crafty manouvre did not succeed. Kelly had not allowed for the stretching of the strips of blanket by his own weight, the point of the hook fastened in his windpipe and gave him so much pain that he struggled violently. He was, however, allowed to hang until really dead, when his sling apparatus was discovered.

THE POPE'S POLICY.-A Rome dis-

The Pope, on receiving the parish priests, recommended them to preach Jesus Christ, His life and teachings, and to guard against the infidelity and immorality so greatly prevailing -the result of a corrupt press. The Pope, in all his exhortations, avoids mention of the Virgin, with the purpose of discountenancing Mariolatry, which his predecessor so long en-couraged. It has shocked most of the people. The Pepe, in his coronation speech, made no allusion to the late Pins IX., although Cardinal Di Pietro, in addressing the Poutiff, had been elequent in his praise of the de-ceased Pope. The omission, therefore, could not be accidental, and the been variously commented upon. The Pope and Cardinal Franchi have determined on a policy of reconciling as far as possible the interests of the Church and State on questions pending with the various Governments.
